Public Safety Chief Position Review:

Proposed Changes:

1. Add the following to the job description to reflect the one officer position:

“The city operates a single-officer public safety model. The Chief of Public Safety serves as the City’s sole sworn law enforcement officer, supported through mutual aid and interlocal agreements with county and regional agencies.”

“The position is designed to operate within the City’s current service model and budget framework; expansion of staffing or services is not presumed and requires formal authorization.”

2. Remove “ON-CALL” and replace it with “The position requires professional availability consistent with executive-level public safety leadership and coordination responsibilities, but does not require continuous on-duty status.”

This avoids the “I’m always working” narrative later.

3. The board appoints or confirms the position, and day-to-day operational oversight, performance evaluation, and disciplinary actions are delegated to the city manager.

**Note that any termination would still require board consultation or approval. That way, it’s aligned with the charter, but it gives the City Manager the authority to manage the role effectively.

4. Consider having reduced certification for fire.

**This will allow for a much larger pool of applicants. Alternative fire chief options can be considered.

AN ORDINANCE AMENDING ORDINANCE C-85 OF THE CODE OF ORDINANCES OF THE CITY OF TRENTON, FLORIDA, RELATING TO HEALTH AND SANITATION; PROMULGATING REQUIREMENTS AND REGULATIONS FOR CONNECTIONS TO WATER AND SEWER TO BE KNOWN AS "THE WATER AND SEWER ORDINANCE"; RESTRICTING USE AND DISCHARGE INTO THE PUBLIC SEWERS; PROVIDING FOR PROTECTION OF THE SYSTEM FROM DAMAGE; ESTABLISHING PENALTIES FOR VIOLATION; REPEALING ALL ORDINANCES OR PARTS THEREOF IN CONFLICT HEREWITH; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

BE IT ORDAINED BY THE BOARD OF COMMISSIONERS OF THE CITY OF TRENTON, FLORIDA, AS FOLLOWS:

SECTION 1. CONNECTIONS WITH WATERWORKS SYSTEM.

Where the same shall be available, the owner of every improved lot or parcel of land within the City of Trenton, Florida, must connect, or cause the plumbing of any building or buildings thereon to be connected, with the municipal waterworks system of the City of Trenton, Florida, and use the facilities of such system. All such connections shall be made in accordance with the rules and regulations which shall be adopted from time to time by the Board of Commissioners of Trenton, which rules and regulations shall provide for a charge for making any such connections in such reasonable amount as such board may fix and determine from time to time.

SECTION 2. CONNECTIONS WITH SEWER REQUIRED.

The owner of each lot or parcel of land within the City of Trenton, Florida, upon which lot or parcel of land any building, mobile home or trailer, is now situated or shall hereafter be situated, for either residential, commercial or industrial use, shall connect or cause such building or buildings, mobile home or trailers to be connected with the public sewer facilities of the municipal sewer system of the City of Trenton and use such facilities, within one (1) month following notification to do so by the clerk of the city; provided, however, that all such connections shall be made in accordance with rules and regulations in effect, or which shall be adopted from time to time by the Board of Commissioners of said city, which rules and regulations shall provide for a charge for making any such connections in such reasonable amount as such board may fix and determine. Provided however, that no connection or connections shall be required where said sewer system or line is more than two hundred (200) feet from such lot or parcel of land.

SECTION 3. EXCEPTIONS TO CONNECTIONS.

This ordinance shall not be construed to require or entitle any person to cross the private property of another to make any such sewer or water connection.

SECTION 4. CONNECTIONS MAY BE MADE BY CITY.

If any such owner of any lot or parcel of land within the city shall fail and refuse to connect with and use the facilities of the sewer system of the city after notification by the City Clerk, as provided herein, then the city shall be authorized to make such connections, entering on or upon any such lot or parcel of land for the purpose of making such connection. The city shall thereupon be entitled to recover the cost of making such connection, together with reasonable penalties and interest and attorney's fees, by suit in any court of competent jurisdiction. In addition and as an alternative means of collecting such costs of making such connections, the city shall have a lien on such lot or parcel of land for such cost, which lien shall be of equal dignity with the lien of state and county and municipal taxes. Such lien may be foreclosed by the city in the same manner provided by the laws of Florida for the foreclosure of mortgages upon real estate.

SECTION 5. RATES.

A. The monthly charges and fees for water services and sewer services have heretofore been set by separate ordinance and where applicable, shall be paid as set-forth by each user of the services as prescribed herein. The city reserves the right to establish by separate ordinance or ordinances future monthly fees for water and sewer charges that may from time to time become necessary without affecting the validity of this ordinance.

B. The city reserves the right to enter into contracts with large users of water and/or sewer service for the purpose of setting and determining a monthly charge or rate for the use of such services, which monthly rate or charge may be computed upon a different basis than set-forth in the preceding paragraph. Such contracts shall be entered into by means of resolution duly adopted by the Board of Commissioners.

C. Any rate charged, or to be charged, that is contrary to or in opposition to the terms of any existing loan, bond, or other financing obligation payable by the city to any third parties in existence at the time of adoption of this ordinance shall to the extent of such conflict be controlled by the terms of the heretofore authorized and enacted obligation.

SECTION 6. ACCEPTANCE OF COMMERCIAL OR INDUSTRIAL SEWAGE DISCRETIONARY.

The City is not obligated to accept sewage from any commercial or industrial concern if said acceptance is determined by the City to be detrimental to the operation of the sewage treatment and collection system.

SECTION 7. UNLAWFUL CONNECTION.

No person shall be allowed to connect into any sewer line or water line owned by the city without the prior written consent of the city, and then the connection with such line shall be made only under the direction and supervision of the city. Any property owner or plumber who shall make any connection without such consent of the city shall, upon conviction be subject to the penalties hereinafter provided.

SECTION 8. UNLAWFUL CONSTRUCTION.

No person, group of persons, firm, or corporation shall build or remodel or cause to be built or remodeled any structure used for human habitation or occupancy within the city which is within three hundred (300) feet of a public sanitary sewer line, unless it is provided with water carried sewerage facilities.

SECTION 9. CONNECTING OLD PLUMBING.

Whenever it is desirable to connect old plumbing with the city sewer or water main, the owner or plumber contemplating doing such work shall notify the city manager who will cause an inspection to be made by a qualified representative of the city and will notify the owner or plumber what alterations will be necessary to place said old plumbing in an acceptable condition for such connection. Any owner or plumber who shall make any connection without the approval of the city's plumbing inspector shall, upon conviction, be subject to the penalties hereinafter provided.

SECTION 10. SANITARY REQUIREMENT.

Every residence and building in which human beings reside, are employed or congregated, shall be required to have a sanitary method of disposing of human excrement, namely, either a sanitary water closet, toilet or commode facility that is connected with the city sewer, or an approved type of septic tank, only where a septic tank is otherwise permitted.

SECTION 11. DISPOSAL REQUIREMENTS.

It shall be unlawful for any person or persons, firm or

corporation owning or leasing any premises in the city to permit the disposal of any human excrement on any property, leased or rented by any such person, firm or corporation or the agent of any such person, firm or corporation, except in a sanitary water closet, toilet or commode facility where sewage lines are available and where such facilities are properly connected thereto, or an approved septic tank, only where a septic tank is otherwise permitted.

SECTION 12. SEPTIC TANK.

No septic tank other than those approved by the State Board of Health and the city shall be constructed within the corporate limits of Trenton, Florida.

SECTION 13. MAINTENANCE OF PLUMBING SYSTEM.

The owner of the property shall be responsible for maintaining and keeping clean the water and sewer pipes leading and connecting from the plumbing system to the city distribution lines and main sewers.

SECTION 14. PAYMENT OF FEES AND BILLS REQUIRED.

Bills for the monthly charges and fees hereinbefore mentioned or hereafter imposed by the Board of Commissioners shall be submitted and shall be payable on the 1st day of each month and if such monthly bill shall be and remain unpaid on and after the 10th day of each month for such service, a penalty shall be imposed and be added to said bill, and, the water service to the consumer shall be subject to discontinuance until all past due water bills and sewage disposal fees are fully paid. The monthly rates for water and sewage usage, together with any penalties for late payment of such charges are more particularly set-forth under separate ordinance or ordinances, which are subject to change from time to time as necessary, at the board's discretion.

SECTION 15. COLLECTION OF SEWER FEES WHERE OWNER HAS PRIVATE WATER SUPPLY.

Where sewage disposal fees are not paid in accordance with provisions outlined above, in those instances where the owner has his own private water supply, the city shall have a right to cut-off such water supply to the plumbing system, and the owner shall have no right to reconnect his own private water supply until the sewage disposal fees have been paid in full. Any violation of this provision by reconnecting his private water supply until such sewage disposal fees are paid in full, shall be considered a violation of this ordinance and subject to the penalties hereinafter provided.

SECTION 16. FAILURE TO MAINTAIN PLUMBING SYSTEM.

Failure to keep the sewer pipe, (for example, the pipe leading from the plumbing system to the city main), clean and maintained in a proper manner will give the city the right to cut off the water connection, which shall not be reconnected until the sewer pipe is cleaned and maintained properly. In those instances where the owner has his own private water supply, the city shall have the right to cut off such water supply to the plumbing system, and the owner shall have no right to reconnect his own private water supply until the sewer pipe leading from the plumbing system to the city main has been maintained and cleaned in proper condition. Any violation of this provision by reconnecting his private water supply or the connection from the city water main, until such sewer pipes are cleaned and maintained properly, shall be considered a violation of this ordinance and subject to the penalties hereinafter provided.

SECTION 17. NO SERVICE FREE.

No water nor sewage disposal service shall be furnished or rendered free of charge to any person, firm, or corporation whatsoever, and the city and each and every agency, department or instrumentality which uses either, or both such services shall pay therefor at the rates fixed by city ordinance.

SECTION 18. SEPARATE CONNECTIONS FOR EACH SEPARATE UNIT.

Each residential unit whether occupying one or more lots and whether it shall occupy any lot or parcel jointly with any other residential unit shall be considered a separate unit for the payment of the water fees and the sewage disposal fees, and separate connections and meters will be required for each such unit.

SECTION 19. DAMAGING, MOLESTING, OR UNAUTHORIZED USE OF ANY WATER OR SEWER FACILITY, OR FIRE HYDRANT.

It shall be unlawful for any person to damage, molest, or to make any unauthorized use of any water mains, fire hydrants, manholes, or any other water or sewer equipment or facility of the city, and the opening of fire hydrants or water valves for securing water therefrom unless duly authorized prior thereto, is prohibited.

SECTION 20. NO PRIVATE CONNECTIONS WITHOUT PRIOR WRITTEN AUTHORIZATION.

It shall be unlawful for any person to connect to or extend the water or sewer system of the city without first securing a written permit issued by the City Manager or their designee and

paying the charges and deposits or other requirements of the city prior to any such connection.

SECTION 21. CONSTRUCTION OF BUILDING SEWERS AND COSTS OF CONSTRUCTION.

A. All cost and expense incident to the connection of any building sewer from the owner's building to the City property line shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may be directly or indirectly occasioned by the connection of the building sewer. Any connection from the City property line into the public sewer shall be made by the City.

B. The building sewer shall be constructed using materials and methods approved by the Standard Plumbing Code, latest available issue, and other specifications included herein.

Joints shall be tight and waterproof. Any part of the building sewer that is installed within ten (10) feet of a water service shall be constructed of cast iron pipe or equivalent as set forth in the Standard Plumbing Code, with compression joints, or shall be encased in concrete. Cast iron pipe with compression joints or equivalent may be required by the City Manager where the building sewer is exposed to damage by tree roots. If installed in filled or unstable ground, the building sewer shall be of cast iron pipe or equivalent, except that non-metallic material may be accepted if laid on a suitable concrete bed or cradle as approved by the City Manager.

C. The size and slope of the building sewer shall be subject to the approval of the City Manager, but in no event shall the diameter be less than four (4) inches. The slope of such 4-inch pipe shall not be less than one-eighth (1/8) inch per foot.

D. Whenever possible the building sewer shall be brought to the building at an elevation below the basement floor. No building sewer shall be laid parallel to or within three (3) feet of any bearing wall, which might thereby be weakened. The building sewer shall be laid at uniform grade and in straight alignment insofar as possible. Changes in direction shall be made only with properly curved pipes and fittings.

E. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such drain shall be lifted by approved artificial means and discharged to the building sewer.

F. All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the City Manager. Pipe laying and backfill shall be performed

in accordance with specifications provided by the City Manager, and no backfill shall be placed until the work has been properly inspected by the city.

SECTION 22. USE OF THE PUBLIC SEWER.

A. No person shall discharge or cause to be discharged any storm water, surface water, ground water, roof runoff, subsurface drainage, cooling water or unpolluted industrial process waters to any sanitary sewer.

B. Storm water and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as storm sewers, or to a natural outlet approved by the City Manager. Industrial cooling water or unpolluted process waters may be discharged upon approval of the City Manager, to a storm sewer or natural outlet.

C. Except as hereinafter provided, no person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewer:

(1) Any liquid or vapor, in significant quantities, having a temperature higher than 150 degrees F., unless a proper permit is obtained from the permitting agency and prior written permission is received from the City Manager.

(2) Any water or waste which may contain more than 100 milligrams per liter of fat, oil, or grease.

(3) Any gasoline, benzene, naphtha, fuel oil or other flammable or explosive liquid, solid or gas.

(4) Wastewater containing more than 25 milligrams per liter of petroleum oil, nonbiodegradable cutting oils, or product of mineral oil origin.

(5) Any garbage that has not been properly shredded. Garbage grinders may be connected to sanitary sewers from homes, hotels, institutions, restaurants, hospitals, catering establishments, or similar places where garbage originates from the preparation of food in kitchens for the purpose of consumption on the premises or when served by caterers.

(6) Any ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood paunch, manure, or any other solid or viscous substance capable of causing obstruction to the flow in sewers or other interference with the proper operation of the sewerage works. Also, any soaps, wax, or other products from any commercial car wash facility in such quantities as to interfere with the proper operation of the sewerage works.

(7) Any water or wastes having a pH lower than 5.5 or higher than 9.0, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewerage works.

(8) Any waters or wastes containing a toxic or poisonous substance in sufficient quantity to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant.

(9) Any waters or wastes containing suspended solids of such character and quantity that unusual attention or expense is required to handle such materials at the sewage treatment plant.

(10) Any noxious or malodorous gas or substance capable of creating a public nuisance.

(11) Any wastewaters having an excess of: (limits in parts per million or milligrams per liter) Silver 0.10, Barium 5.0, Tin 1.0, Iron 2.0, Phenol 0.2, Arsenic 0.05, Boron 1.0, Manganese 1.0, Lead 0.1, Mercury 0.005, Nickel 0.4, Zinc 1.0, Copper 0.1, Cadmium 0.02, Total Chrome 1.8, Selenium 0.02, Chlorides 250, and any substance or combination thereof that reduces the BOD by 10% will be considered as a toxic material. In addition, the limits for the following are: Antimony 0.0, Beryllium 0.0, Bismuth 0.0, Cobalt 0.0, Cobalt 0.0, Cyanide 0.0, Molybdenum 0.0, Rhenium 0.0, Tellurium 0.0, Uranylion 0.0, Strontium 0.0, herbicides 0.0, fungicides 0.0, and pesticides 0.0.

(12) Any radioactive wastes or isotopes of such half-life or concentrations as may exceed limits established in compliance with applicable State or Federal regulations.

(13) Quantities of flow, concentrations, or both which constitute a "slug" being defined as: any discharge of water or wastewater which in concentration of any given constituent or in quantity of flow exceeds for any period of duration longer than fifteen (15) minutes more than five (5) times the average twenty-four (24) hour concentrations of flows during normal operation and shall adversely affect the collection system and/or performance of the wastewater facilities.

(14) Waters or wastes containing substances which are not amenable to treatment or reduction by the wastewater treatment processes employed, or are amenable to treatment only to such degree that the wastewater treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

(15) Wastewater containing constituents in concentrations

which are in excess of the concentrations set for normal wastewater treatment as set by appropriate and applicable State and Federal regulations.

D. Grease, oil, and sand interceptors (traps) shall be provided when, in the opinion of the City Manager they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, and other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the City Manager and shall be located as to be readily and easily accessible for cleaning and inspection.

Grease and oil interceptors (traps) shall be constructed of impervious materials capable of withstanding abrupt and extreme changes in temperature. They shall be of substantial construction, watertight, and equipped with easily removable covers which when bolted in place shall be gastight and watertight.

E. When installed, all grease, oil, and sand interceptors (traps) shall be maintained by the owner, at his expense, in continuously efficient operation at all times, and the owner shall thereof shall be responsible for the proper removal and disposal by appropriate means of the captured materials, and shall maintain records of the date, and means, of disposal which are subject to review by the City Manager. Any removal and hauling of the collected materials not performed by owner's personnel must be performed by currently licensed waste disposal firms.

F. The admission into the public sewers of any water or wastes having (1) a 5-day Biochemical Oxygen Demand greater than 300 milligrams per liter, or (2) containing more than 350 milligrams per liter of suspended solids, or (3) containing any quantity of substances having the characteristics described in Section 22-C hereof, or (4) having an average daily flow greater than 2% of the treatment plant design capacity, or (5) having a peak hour flow greater than 20 gallons per minute, shall be subject to the review and approval of the City Manager. Where necessary in the opinion of the City Manager, the owner shall provide at his expense, such preliminary treatment as may be necessary to (1) reduce the Biochemical Oxygen Demand to 300 milligrams per liter and the suspended solids to 350 milligrams per liter, or (2) reduce objectionable characteristics or constituents to within the maximum limits provided for in Section 22-C hereof, or (3) control the quantities and rates of discharge of such water or wastes. Plans, specifications and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the City Manager and no construction of such facilities shall be commenced until said approval is obtained in writing.

G. Where preliminary treatment facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation, by the owner at his expense.

H. When required by the City Manager, the owner of any property served by a building sewer carrying industrial wastes shall install a suitable control manhole in the building sewer to facilitate observation, sampling and measurement of the wastes. Such manhole, when required shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the City Manager. The manhole shall be installed by the owner at his expense, and the owner at his expense shall maintain the same so as to be safe and accessible at all times.

I. All measurements, tests and analysis of the characteristics of waters and wastes to which reference is made in Sections 22-C and 22-F hereof, shall be determined in accordance with "Standard Methods for the Examination of Water and Sewage", and shall be determined at the control manhole provided in Section 22-H hereof, or upon suitable samples taken at such control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected.

J. No statement contained in this article shall be construed as preventing any agreement or arrangement between the City and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the City for treatment, subject to payment therefor by the industrial concern, in an amount proportionate to the impact of said industrial waste on the sewerage system.

SECTION 23. POWER AND AUTHORITY OF INSPECTORS.
